

Auto Splicer

for the corrugation board line

The Automatic Servo Control Paper Splicer is designed to ensure continuous production without stopping the machine during paper roll changes. With advanced PLC control, high splicing accuracy, and a reliable pneumatic system, the machine improves production efficiency while minimizing material waste and downtime. It is suitable for printing, corrugation, converting, and packaging production lines.

Major Benefits

- Zero production stoppage during roll change
- Increase corrugation line productivity
- Reduce paper wastage
- Lower manpower dependency

Applications

- 2 Ply Corrugation Lines
- 3 Ply / 5 Ply Corrugation Plants
- High-Speed Board Production
